Serial No. 10/663,181 PATEN

Attorney Docket No.: 50623.334

CLAIMS:

Please amend the claims as follows:

Claims 1-24 (canceled)

25. (Currently Amended) A drug-loaded particle formulation method comprising:

adding polymeric particles containing a therapeutic substance to a fluid form of an implantable medical device coating material, wherein the coating material includes a polymeric material dissolved in a solvent:

applying the fluid form of the coating material comprising the polymeric particles added thereto to an implantable medical device; and

solidifying the coating material to a film layer <u>by allowing the solvent to</u>

<u>evaporate</u>, wherein the film layer includes the polymeric particles containing the
therapeutic substance.

- 26. (Canceled)
- (Previously presented) The method of Claim 25, wherein the implantable medical device is a stent.
- 28. (Canceled)
- 29. (Canceled)
- 30. (Previously presented) The method of Claim 25, wherein the polymeric particles are made by water-in-oil emulsion method.
- 31. (Previously presented) The method of Claim 25, wherein the polymeric particles have a hydrogel consistency.
- 32. (Previously presented) The method of Claim 25, wherein the therapeutic substance is for the treatment of restenosis.

Serial No. 10/663,181 PATENT

Attorney Docket No.: 50623.334

33. (Previously presented) The method of Claim 25, wherein the therapeutic substance is a radioactive isotope.
